

Vantage Oncology at Redhawk Radiation Therapy Center to Open Early February

New Center Marks \$4 Million Investment in State-of-the-Art Technology and Facility

TEMECULA, Calif. (January 26, 2006) – The new Vantage Oncology at Redhawk Radiation Therapy Center will be opening its doors to patients in Temecula in early February. Vantage Oncology Inc., an El Segundo, Calif.-based developer and operator of state-of-the-art radiation oncology centers, has invested approximately \$4 million in the most advanced technology and comfortable facilities in the new center located in the Redhawk Medical Building on Highway 79 in Temecula. Valley Radiotherapy Associates (VRA) will provide professional services in the center.

The new technology which includes a Varian Clinac iX Linear Accelerator with On Board Imaging capability, a General Electric CT Simulator, and the Varian Eclipse Planning System, brings patients increased access to advanced treatment options, including Intensity Modulated Radiation Therapy (IMRT), Image Guided Radiation Therapy (IGRT) and Respiratory Gating. Dr. Mary Ann Rose, who has served for two years as Medical Director of Vantage Oncology at Wildomar Radiation Therapy Center, will assume leadership of the new facility. In addition, Dr. Brian Ronson has recently been recruited from Loma Linda to serve the community in connection with the expansion. "I look forward to continuing to work with Dr. Ronson to provide cancer patients in the Temecula Valley with the most advanced technology and services in a comfortable and caring environment," said Dr. Rose.

"Cancer continues to affect hundreds of thousands of people every year and, as a patient, you want a team of experts that is dedicated to helping you beat this disease," said Michael T. Fiore, CEO of Vantage Oncology. "It is our mission to provide a standard of care for cancer patients that is unequalled by other facilities."

About Vantage Oncology, Inc.

Founded in May 2002, Vantage Oncology, Inc. develops, acquires and operates state-of-the-art radiation oncology centers. El Segundo, Calif.-based Vantage Oncology is led by a seasoned management team, including Chief Executive Officer Michael Fiore, Chief Medical Officer Leslie Botnick, M.D., Chief Financial Officer Marshal Salomon and Chief Development Officer Mark Ahern. Vantage Oncology was created in response to the growing need among cancer patients, hospitals and physicians for accessible and advanced radiation treatment therapies and was funded by Conning Capital Partners, New Enterprise Associates, Versant Ventures and Salix Ventures.
